

# Installation Guide

## Blade Bar

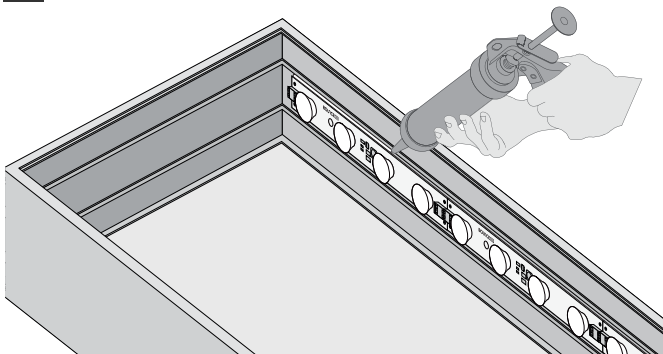

**WARNING:** Risk of electrical shock. Please read these instructions completely and carefully. Disconnect power before servicing or installing product.

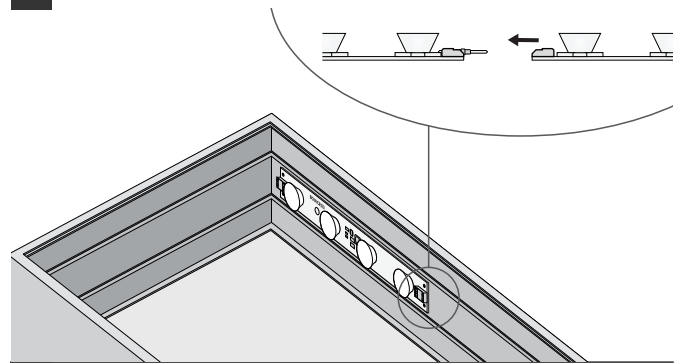

- 1 Ensure lightbox surface is clean and free from debris. We recommend ensuring the internal surfaces are painted matte white to encourage illumination.

- 3 Secure the LED bars by gluing them in place.

- 2 Using the supplied LED Layout, remove tape from the rear side and stick LED bars in place, using the supplied clips.

- 4 Using Wago connectors, wire up the LED bars to the transformer, ensuring not to exceed the maximum series. Wire in parallel if required. Exceeding the maximum series will result in voltage drop.
