

Installation Guide

Cobra & Cobra Plus

WARNING: Risk of electrical shock. Please read these instructions completely and carefully. Disconnect power before servicing or installing product.

- 1 Cut LED strip to required size, taking care to only cut at intervals marked on the product. Note the maximum series length to avoid voltage drop.

- 3 Solder connecting 'wire tails' to terminals for connection to power supply, or for 'bridging wires' for linking of strip segments. Always ensure positive-positive and negative-negative connection.

- 2 Ensure that your channel letter or application area is clean and free of debris. Remove adhesive liner from the back of strip and press flex strip into place.

- 4 Connect to suitable power supply (and dimmer/controller if required) and test.
