

Installation Guide

Prism/Prism Plus

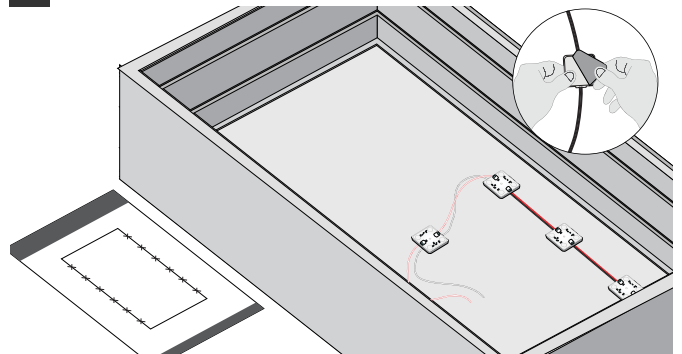

WARNING: Risk of electrical shock. Please read these instructions completely and carefully. Disconnect power before servicing or installing product.

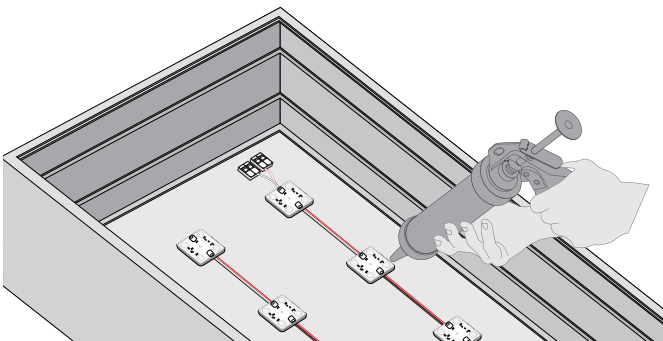

- 1 Ensure the inside of your channel letter or sign box is clean and free of debris. For best illumination ensure the inside of the box is white (matte finish preferred).

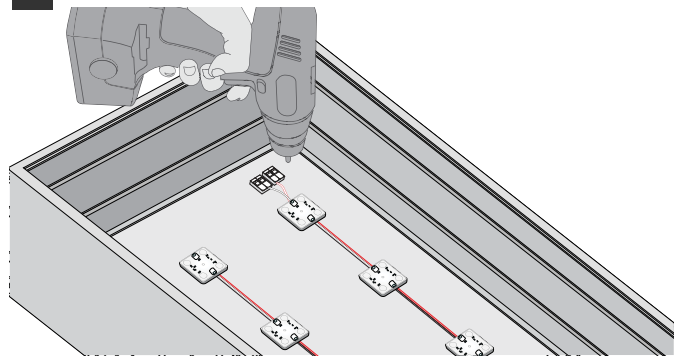

- 2 Using supplied LED layout, remove tape from module and press firmly into place.

- 3 Secure LEDs by gluing modules in place. Ensure glue does not come into contact with LED lens as this will affect the light hue.

- 4 Drill a suitably sized hole out the back of the sign for connection to DC power supply.

- 5 Connect modules from the sign to power supply, making sure to not exceed maximum series. Exceeding the maximum series will result in voltage drop.
