

# Installation Guide

## Micro Bar

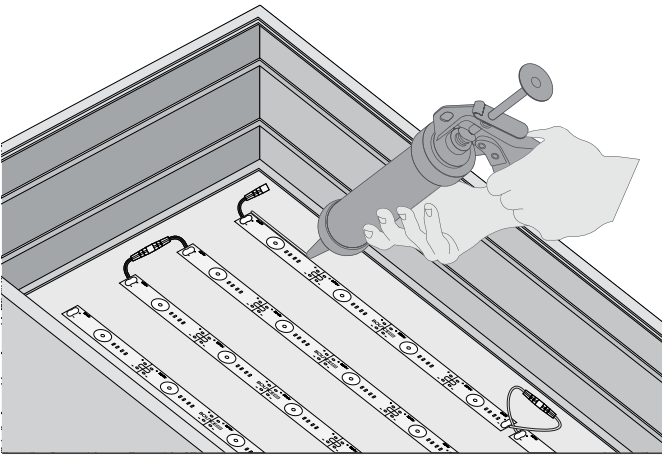

**WARNING:** Risk of electrical shock. Please read these instructions completely and carefully. Disconnect power before servicing or installing product.

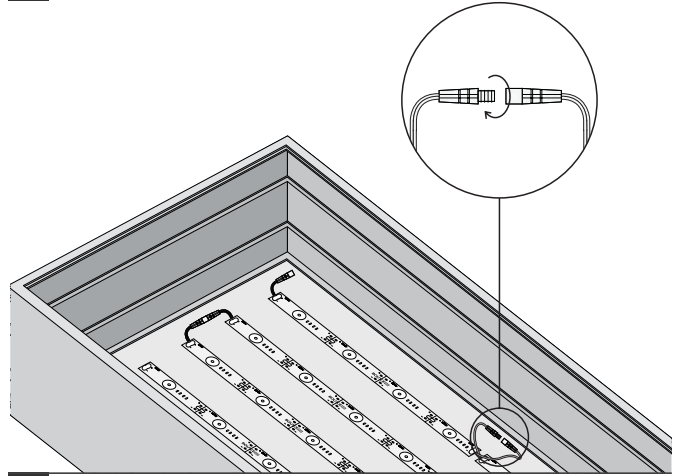

- 1 Ensure lightbox surface is clean and free from debris. We recommend ensuring the internal surfaces are painted matte white to encourage illumination.

- 3 Secure the LED bars by gluing them in place.

- 2 Using the supplied LED layout, remove tape from the rear side and stick LED bars in place, twisting the connectors together.

- 4 Using Wago connectors, wire up the LED bars to the transformer, ensuring not to exceed the maximum series. Exceeding the maximum series will result in voltage drop.
